

September 09, 2018

Dear Chief Larry Nooski and council,

As our Incident Management Team transitions out, we wanted to pass on our gratitude to the Nadleh Whut'en First Nation for the partnership during the past few weeks on the Fraser Complex of wildfires.

Progress on mopping up and demobilizing sections of the fires is still ongoing and resources will remain as long as needed. We recognize the impacts that wildfires of this size and severity can have, and we applaud the resilience that is being demonstrated by the community. The lessons learned and good working relationship has built a strong and respectful foundation.

Working collaboratively through your EOC and fire crews as active participants in emergency response and decision-making processes allowed us to communicate better and improve the overall emergency response, and for that, we thank you.

All the best,

BC Wildfire Service Incident Management Team 5
